**Manuscript Type:** Original Article

Dear Reviewers,

Thank you for your time reviewing our manuscript and for your helpful suggestions.

We have reviewed the manuscript to incorporate mentioned changes. More specifically:

- 1) Minor language modifications have been made
- 2) References to the literature and tables have been removed from the abstract
- 3) Unfortunately, our facilities did not use magnetic endoscopic imaging during the years this study reviewed
- 4) Quality of bowel preparation was only used as a variable in univariate and multivariate analysis of increased fentanyl and midazolam doses and was not used for final model design.

We are re-submitting the manuscript to the World Journal of Gastrointestinal Endoscopy as was suggested.

Thank you for your help,  
Alexandra Shingina
