

## Patient Consent Form

Title of publication: World Journal of Hepatology

Title of manuscript: Contrast-enhanced sonographic findings of inflammatory hepatocellular adenoma

Principal author: Mariko Kumagawa

I understand that:

The information/video/photographic material will be used only in educational publications intended for health professionals

(1) My name will not be published and Baishideng Publishing Group will endeavor to ensure that I cannot be identified from the clinical information, other than in relation to identifiable material (such as videos/photographic material) for which I give consent. However I also understand that there is a low possibility that I may be identified from the clinical information.

(2) If the publication or product is published on an open access basis, I understand that it may be accessed freely throughout the world.
