**6- Reviewers' Comments to the Author:** “This is a well-written philosophical commentary and report of a media event that took place in Porto, Portugal. The only issue is if this is the right journal for this commentary?”.

**Amendment:** The authors thank the commentary and believe this is a fair article for this journal.

**7- Reviewers' Comments to the Author:** “I think that this manuscript is a well written and elegant one. It is a general commentary about the Project "Movies & Health in Night talks". The authors talk of the great opportunity that physicians (Gastroenterologist in specific), have to share points of view with other persons (art specialists, and general public). The authors consider that physicians in general need to have these kind of discussions. It is good for doctors as well for general public. I believe that is a good manuscript that can published in the Journal without changes.”.

**Amendment:** The authors thank the commentary.

All named authors, contributing directly to the work described, have read the revised manuscript and approved submission.

Yours sincerely,

Marco Silva, M.D.
