

Dear Editor  
Fang-Fang Ji,  
Science Editor, Editorial Office  
World Journal of Psychiatry

We are very grateful to you for considering the publishing of our manuscript in your journal. To receive 2 positive reports from two reviewers, both with recommendation of acceptance, B classification degree (Very good) and A degree language, encourages us to go on ahead with the process. For this reason, we extend our gratitude for the work you and the reviewers have performed.

We have taken into account the editor's and reviewers' comments having replied to theirs proposals.

In this way, we have revised both Google Scholar where there are not similar records to manuscript's proposed title and Crossref with Write Check software when revising article's contents. This obtained a 3% similarity after excluding quotes and bibliography. Therefore, according to the software it has a 97% of original contents.

Nevertheless, I would like to show evidence of my nonconformity about publishing process.. In summary, it is too complex and is not at all easy to follow it. It is not recommendable the reading of tutorials so extensive with so many requirements for submitting a publication. System should have to go more directed to a innovation of its infrastructure and contents in plainness and efficacy, such as PeerJ or PlosOne models.

Regarding signature of assignment copyright, we have tried to coincide with the authors, bearing in mind that it is vacation season and it is difficult to coincide physically, mainly, with those ones being abroad.

Also having into account the notes of this document, I wish to communicate that one of the authors' name is written in a different way. Instead of Satacana Maria Forns, the text should say Maria Forns Santacana. We have allowed ourselves to make this little change, for it should go in this way.

We thank you for your time and previous orientations.

Yours sincerely in the name of our research team.

Dr. Ernesto Magallán-Neri

## REPLY TO WJP EDITOR AND REVIEWERS

We are very grateful to you for considering the publishing of our manuscript “Ecological Momentary Assessment with Smartphones for measuring mental health problems in adolescents.” with ID: 27832 in the World Journal of Psychiatry. We extend our gratitude for the work of the reviewers you have performed.

Replies to the Editor’s comments.

On Page 1.

Comment 1. Please confirm all names. Thank you!

R= Only an important change, instead of Santacana Maria Forns, it should say Maria Forns Santacana. This change has also been performed in the document of copyright transfer.

Comment 2,3,4: Please offer the city and postcode! Thank you!

R= Information on city and postcode have now been added.

Comment 5: The approved grant application form(s) will be released online together with the manuscript in order for readers to obtain more information about the study and to increase the likelihood of subsequent citation. Our purpose of publishing the approved grant application form(s) is to promote efficient academic communication, accelerate scientific progress in the related field, and improve productive sharing of research ideas. In addition, a copy of the full approved grant application form(s), consisting of the information section and body section, should be provided to the BPG in PDF format.

R= These documents were already sent in the second occasion, when your editor asked for them. If it is necessary we can submit them again, but bearing in mind that to ask repeatedly for the same documents is inconvenient.

On page 2.

Comment 1: Data sharing statement: Please offer signed pdf file. Thank you!

R= It is included now.

Comment 2: Only one address needed, please delete one institute. And please offer more details of address, such as street or avenue. Thank you!

R= It is already corrected.

On page 4.

Comment 1 (Audio core tip): Please offer the audio core tip.

R = the audio core tip it is already added.

Page 18

Comment 1 (Comments): Please write the comments.

R= It is included now.

Page 27

Comment 1 (Figure 2): Would you please provide the decomposable figure, whose parts are movable and words can be edited.

R= It is included in a ppt file “EMA CYCLE”.

Replies to the Reviewers’ comments.

## ESPS PEER-REVIEW

**Name of journal:** World Journal of Psychiatry

**ESPS manuscript NO:** 27832

**Title:** Ecological Momentary Assessment with Smartphones for measuring mental health problems in adolescents.

**Comments of the reviewer 00506481:** The authors have reported their findings based on Ecological Momentary Assessment with Smartphones for measuring mental health problems in adolescents. The study was well taken and the results indicate that such an evaluation is helpful to assess whether using smartphones is a useful tool for assessing daily dynamics or sufficiently accurate measure of the psychopathological manifestations experienced by community adolescents. In the study of momentary states associated with mental health symptomatology over a week it was observed that in most cases adolescents do not present emotional alterations or problems in their daily life. Girls were slightly more affected in their momentary emotional status and behaviors in daily life than boys. And among the situations in which a conflict is generated – on the one hand, anxious-depressed states, and on the other the oppositional-aggressive behavior are closely inter-related. It is a useful outcome which shows that the family and home context could be crucial for the potential development of training interactions, both positive and negative, in the mental

health field, and they also stress the importance of individuals' coping resources in relation with their formative, relational, and physical context.

The corrections to be made are indicated in yellow/blue highlight. The placement of the Figure or Table is required in the manuscript.

R= Thank you for the good summary of our work and correction proposals marked. Journal publishing team has attended us with regard these details.

**Comments of the reviewer 00503286:** The paper Ecological Momentary Assessment with Smartphones for measuring mental health problems in adolescents should be published in World Journal of Psychiatry after minor correction.

R= Thank for your comments of supporting our manuscript we are working on corrections raised by publishing team.

In summary, we are very grateful both publishing team as well as reviewers' assessment of our work.

Yours sincerely in the name of our research team.
