Editorial Staff
World Journal of Hepatology

Dear Editors,

First and foremost, thank you for reviewing and asking for revisions to our original article entitled "Spontaneous Bacterial Peritonitis Prevalence in Pre-Transplant Patients and its Effect on Survival and Graft Loss Post-Transplant". I appreciated the recommendations regarding the abbreviation of Hepatitis C and have remedied that in the manuscript. I also changed some misspelling and corrected the format of the references. We hope this paper will raise awareness of the potential effects of SBP on transplanted patients morbidity and mortality.

Thank you for your consideration,

Neeral Shah, MD
Associate Professor
