

## 28384-Biostatistics Statement

**Name of journal:** World Journal of Nephrology

**Manuscript NO.:** 28384

**Manuscript type:** Observational Study

**Title:** Prevalence of risk factors for cardiovascular and kidney disease in Brazilian healthy preschool children

**Authors:** Adriana Cândida da Silva, Marcelo de Sousa Tavares and Maria Goretti Moreira Guimarães Penido

This study followed the statistical criteria required:

- (1) Statistical methods were adequately and appropriately described when they were used to verify the results;
- (2) The statistical techniques were correct;
- (3) Standard deviations were preferred to standard errors. The number of observations and subjects (n) was given. Losses in observations, such as drop-outs from the study, were reported;
- (4) Values, such as ED50, LD50 and IC50, had the 95% confidence limits calculated and had been compared by weighted probit modeling;
- (5) The word "significantly" was replaced by its synonyms (if it indicated extent) or the P value (if it indicated statistical significance).
