3<sup>rd</sup> November, 2016

Dear Jin-Xin Kong,

we resubmit our invited review “Generalizable items of quantitative and qualitative cornerstones for personnel requirement of physicians in anesthesia” by Manfred Weiss, Rolf Rossaint and Thomas Iber for the “World Journal of Critical Care Medicine”.

We revised our manuscript according to the reviewers’ comments. Attached please find out revisions in the manuscript file edited by the editor. We highlighted all our changes in the updated version.

Reponse to review 00506158

1. The introduction section of this article is too long. I suggest that it be shortened.

We shortened the introduction by 2/3, i.e., from 778 to 249 words.

2. Although adequate explanation about the tables in the text, they do not seem clear enough. They could presented filled with a sample.

We filled the tables with samples for better understanding. In addition, we explained the tables in more detail within the text.

Reponse to review 02484487

Reviewer 02484487 had no comments for the authors.

Thank you very much for your invitation for contribution of our work to the World Journal of Critical Care Medicine.

Best regards,

Manfred Weiss
