

Udine, 30th November 2016

Dear Editors,

I want to thank you, once again, for the opportunity to send you the revised version of the manuscript "Molecular classifications of gastric cancers: novel insights and possible future applications" (numbered 29799).

As you have requested, I have uploaded the final version of the manuscript ready to be submitted for final publication on World Journal of Gastrointestinal Oncology (previously you had kindly asked to us to send our manuscript, upon invitation, to be published on World Journal of Gastrointestinal Surgery) as it was decided by you after judgement of one of the referees.

Following the indication provided by the referees and by the Editor, I have conducted a revision of my manuscript as follows:

- 1- Zip codes were inserted for each of the authors that contributed to the manuscript
- 2- Language was checked and polished in order to be in fluent and current scientific English (corrected sentences are highlighted)
- 3- The image was separately sent in the original editable format (powerpoint)
- 4- There is no conflict of interest to be declared by the author, nor any funding for the research the manuscript focused on since it is a review paper (it was declared in the paper according to your format)
- 5- All of the fields of the manuscript were completed following the guidelines sent by Baishideng publishing group and according to WJGO requirements
- 6- An audio core-tip was registered as required (mp3 format)
- 7- No English language certificate was sent since the first author is a native English speaker
- 8- Finally, a point to point revision of the comments of reviewers, who did not have any significant objection as to the scientific content, was conducted carefully. English language was polished without changing the concept of the original manuscript.
- 9- The required Copyright Assignment is attached
- 10- A screenshot of the result of the google scholar search for the title of the paper is attached as well.
- 11- We finally checked that all the required forms were uploaded.

Once again, I want to thank you for appreciating our manuscript at the review level, hoping to hear from you soon for the final considerations about the publication.

Best Regards,

Dr. Silvio Ken Garattini

Dr. Giuseppe Aprile
