Name of Journal: *World Journal of Gastrointestinal Endoscopy*

ESPS Manuscript NO: 29924

Manuscript Type: Review

Comments of Referee:

- 1) Cite each sentence in the text particularly in the introduction.
- 2) I can only suggest in the Conclusions to add some words to remind readers about possible complications when different techniques are employed; readers should be also invited to reflect on the fact that the decision to treat a pancreatic lesion is sometime the real difficult task above all for pancreatic cystic lesions.
- 3) I have found some minor typos in the manuscript: -the most promising areantitumoural: are antitumoral (pag 1) -pancreas cancer: pancreatic cancer - with separed cysts [68] : with septated cysts

Authors Reply:

- 1) Thanks for the suggestion. We have added the relevant citations in the introduction.
- 2) Thanks for the suggestion. We have now added a sentence in the conclusion regarding the possible complications of the mentioned techniques and the difficulties in providing an indication for treatment.
- 3) Thank you. The mentioned mistakes have been corrected.
