Reg: World Journal of Cardiology Manuscript NO.: 30219 Column: Minireviews

**Title:** Coronary artery disease detection- limitations of stress testing in patients with left ventricular dysfunction

Dear Dr Kong

We appreciate the useful suggestions and thorough review of our manuscript. We have made following revisions according to their suggestions:

1. We have outlined dobutamine stress echocardiography protocol and referenced it as well.
2. We have added our illustrative images for cardiac MRI stress testing describing how it would help differentiate various forms of cardiomyopathy.
3. We have formatted the manuscript and references to journal requirements.
4. We added the audiofile for core audio tip

Please let us know if we need to do anything else at this time.

With warm regards

Anand
