

Dear Editor of Word Journal of Gastroenterology,

I would be pleased to submit the revised version of our manuscript 30284

As the main 'criticism' of peer reviewers was based on language polishing of our manuscript and stated on improving the English grammar of our manuscript, we achieved a better grammar throughout the manuscript. Two colleagues familiar of this kind of papers have read and approved the revised manuscript. In revised paper, we have indicated all changes by highlighting the amended portions.

Thank you for your consideration of our work

Tahereh Falsafi, professor of Microbiology, Department of Microbiology, Faculty of Biological Sciences, Alzahra University, Tehran, Iran.
