

Dear reviewer:

Thank you for your time and your valuable advice to our manuscript. The following is our revision according to your advice.

1. The autophagy we tried to examine in this study is macroautophagy, and we have already replaced all the “autophagy” to “macroautophagy” according to your advice;
2. The TEM analysis was performed to determine the autophagy was activated and we have already added the methods in the manuscript according to your advice.
3. We have already examined the expression of Beclin1 and LC3B expression by western blot in the manuscript, please check it.
4. According to your advice and the requirement of WJG, we have revised the manuscript all through, according to your advice.

Best regards,

Pengfei Qiao.
