This is a well written paper. But some language errors need to be revised, such as in Conclusion of abstract, "There was" should be "There were"; the sentence "Further investigation is warranted given the importance of greater transparency in healthcare."is incomprehensible.

We have corrected “there was” to “there were” in the conclusion of the abstract (Line 93). We have also changed the confusing sentence, “Further investigation is warranted given the importance of greater transparency in healthcare."is incomprehensible” to: “Improved transparency of COI disclosures is warranted among trauma researchers presenting at national meetings” (Line 94).
