## COMMENTS TO AUTHORS

Interesting case report of a rare case and it most probably really is the first reported case.

## COMMENTS TO AUTHORS

The manuscript by Kourie, et al. presents the first case of Charcot-Marie-Tooth disease identified after the administration of docetaxel in combination with anti-HER2 antibodies. This is an important case report. However, information regarding the metastatic breast cancer of this patient is inadequate. Major comments: 1. The authors should provide more detailed information about the patient, such as age and gender, in the Abstract section. Moreover, the authors should provide comprehensive information regarding the patient's metastatic breast cancer, such as tumor size and metastatic lesions and their size, in more detail in the Clinical case section. Did the patient have stage IV breast cancer? 2. The authors should describe the methods used to analyze the PMP22 gene and their results in more detail. 3. The patient was given not only docetaxel but also anti-HER2 antibodies with trastuzumab and pertuzumab. The authors should discuss the influence of the anti-HER2 therapy on the manifestations of

Charcot-Marie-Tooth disease. Minor comments: 1. In the title: "Charcot-Marie-Tooth" should be replaced to "Charcot-Marie-Tooth disease" or "Charcot-Marie-Tooth hereditary neuropathy". 2. In the first sentence of the Abstract and the Introduction sections: "Charcot-Marie-Tooth" should be replaced with "Charcot-Marie-Tooth (CMT)". 3. In the Keywords: "Charcot Marie Tooth" should be replaced with "Charcot-Marie-Tooth". 4. In Table 1, what are "ALL" and "Burkitt"? All abbreviations should be defined and any other names explained.
