

RECOMMENDATION FORM FOR ETHICAL REVIEW OF CLINICAL TRIAL/SCIENTIFIC RESEARCH

Number: 201212078

Protocol Name	Early hepatitis B viral DNA clearance predicts treatment response at week 96		
Responsible department	Department of Infectious Disease	Main researcher	Xiaoyu Fu, Deming Tan, Cuimei Liu, Shifang Peng
Research Classification	1 <input type="checkbox"/> 2 <input checked="" type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/>	Duration	2013.10-2016.10
Research type	Clinical Research		
Research institution	Key Laboratory of Viral Hepatitis, Department of Infectious Disease; Xiangya Hospital, Central South University		
Review action	Agree <input checked="" type="checkbox"/> ; modification <input type="checkbox"/> ; disagree <input type="checkbox"/>		
<p>Main contents of the study involving in the human bodies:</p> <p>Based on the principles(voluntary, confidential, security, compensation), the subject will be voluntary and be guaranteed. We would maximize to protect the interests and privacy of the subject. We also claimed that the research content and the results would have no conflicts of interest.</p> <p>Ethical review opinions: From the hospital ethics committee review, the research of clinical design and scheme are fully considering the safe and fairness principle, the contents wouldn't cause any harm and risk to the subjects. Subject's right have been guaranteed. The research are fully embodied the principles(voluntary, confidential, security, compensation), protecting the patients' interests and privacy. The research contents and results have no conflicts of interest.</p>			
<p>Note :study classification :1=the use of pathological tissue ;2=human trials ;3=human tissue or cell test ; 4=Embryonic cloning research ; 5=Other</p>			

Medical ethics committee,
Xiangya Hospital,
Central South University

Date: 2012.12.11
