COMMENTS TO AUTHORS

EXCELLENT SUBJECT WELL WRITTEN, AT THE POINT. ALTHOUGH RARE THE INFECTIONS, THE RESULT MAY BE DEVASTATING. IT IS ACCEPTED AS IT IS.

COMMENTS TO AUTHORS

This article presents an overview of the presence of deep shoulder infections following a rotator cuff repair. Overall, the manuscript is well written and include the necessary information about risk factors, diagnosis and management of this condition. The only comment I have is related to the quality of the studies that were used in this review. In my view, a discussion about the limitations of previous publications (e.g. retrospective studies) is required.
