Subject: RE: Question

Hello

A single case report does not constitute research. The policy remains the same. Good luck on reporting the interesting case to a journal.

Lynne Paul

Subject: Question

Dear Lynne,

Up until now a single case report has not needed IRB approval, and was exempted by the IRB. We plan to report a single case report of bladder cancer extending into the prostate. Is the policy still the same that a single case report does not need IRB approval at Beaumont Hospital?

Thank you,

Vinayata Manuballa
