Title: Antioxidant dietary approach in the treatment of fatty liver: new insights and updates

Reviewer 1:

Dear Editor, It is well designed and written article

Reply: Thank you for your positive comments.

Reviewer 2:

This is an extensive review in an important aspect of understanding fatty liver. The importance of mitochondria is explained. It has wide coverage of the topic as it includes cogent summaries on many natural substances that have been investigated as potential treatments for fatty liver.

Reply: Thank you for your positive comments.

Editor:

We modified the abstract (more than 200 words)

We added a comment in Figure 1 legend.

We provided Figure 1 in ppt format.

Filipodia revised the language of the manuscript.
