## COMMENTS TO AUTHORS

Barreto et al.: Solid blues behind broken hearts This is a cross-sectional survey of risk factors associated with depression in patients hospitalized in non-surgical wards and suffering in cardiovascular disease. As both cardiovascular diseases and depression are frequent and possessing a great burden on the family and the society, the study is relevant and interesting. Detailed comments: The title is romantic, but does not cover what the study is. Please give a more detailed and informative title! Abstract: please give the full name for UFMG before using the abbreviation. Abstract, Methods section: it should be mentioned how resilience and childhood trauma and the severity of nicotine dependence was evaluated. Material and methods section, subject subheading: I cannot understand why patients with mild cognitive impairment were excluded. Please explain it! Material and methods section, subject subheading: authors list cerebrovascular diseases among cardiovascular diseases, but it is a different group. Authors should exclude those patients with cerebrovascular diseases and run the

statistical analysis again on the rest of the sample. Material and methods section, Instruments and procedures subheading: authors state that 'After a clinical assessment and stabilization, they included all subjects at admission in the ward.' What do you mean on stabilization? What was the time frame of this stabilization? English style of the manuscript needs editing.

## COMMENTS TO AUTHORS

Dear authors, I have a few comments on your manuscript: - Abstract - Methods: The abbreviation UFMG should be explained - Abstract - Results: The "p" should be lower than 0.05, not equal or higher - Introduction - the second paragraph from behind - the second sentence: It should be "The same is applied for..." - Material and Methods: Ethical issues should be an independent paragraph - Figure 1: The first square - November and October should be with "N" and "O" (capital letters) - Table 1: The title is too long, you should not state the results in the title of the table The reviewer
