Follow-up after curative resection for gastric cancer: Is it time to tailor it?

Paolo Aurello, Niccolò Petrucciani, Laura Antolino, Diego Giulitti, Francesco D'Angelo, Giovanni Ramacciato

### Abstract

There is still no consensus on the follow-up frequency and regimen after curative resection for gastric cancer. Moreover, controversy exists regarding the utility of follow-up in improving survival, and the recommendations of experts and societies vary considerably. The main reason to establish surveillance programs is to diagnose tumor recurrence or metachronous cancers early and to thereby provide prompt treatment and prolong survival. In the setting of gastric
