<input type="checkbox"/> Grade D: Fair	<input type="checkbox"/> Grade C: A great deal of language polishing	<input type="checkbox"/> Plagiarism	<input type="checkbox"/> Rejection
<input type="checkbox"/> Grade E: Poor		<input checked="" type="checkbox"/> No	<input checked="" type="checkbox"/> Minor revision
	<input type="checkbox"/> Grade D: Rejected	BPG Search:	<input type="checkbox"/> Major revision
		<input type="checkbox"/> The same title	
		<input type="checkbox"/> Duplicate publication	
		<input type="checkbox"/> Plagiarism	
		<input checked="" type="checkbox"/> No	

## COMMENTS TO AUTHORS

To Authors, The article is well written but the major concern is that opioids are not considered. Morphine is the gold standard of opioids, it is used for intra and postoperative pain but has immunosuppressive effects while some studies state that opioid receptors can modulate virus induced airway inflammation. (Crit Care Med 1013) I think that a little comment on opioids could be interesting
