# Protein-losing pseudomembranous colitis with cap polyposis-like features

Wolfgang Kreisel, Guenther Ruf, Richard Salm, Adhara Lazaro, Bertram Bengsch, Anna-Maria Globig, Paul Fisch, Silke Lassmann, Annette Schmitt-Graeff

**Abstract**

Protein-losing enteropathy (PLE) is characterized by loss of serum proteins into the gastrointestinal tract. It may lead to hypoproteinemia and clinically present as protein deficiency edema, ascites, pleural or pericardial effusion and/or malnutrition. In most cases the site of protein loss is the small intestine. Here we present an unusual case of severe PLE in a 55-year old female with a one-year history
