COMMENTS TO AUTHORS

This is a very nice and timely review on the state of the art of pharmacological treatment in advanced colorectal cancer. I just have a couple of minor suggestions 1. I would highlight in the review title and abstract that the metastatic disease is the main focus of the review

Thank you for the suggestion, we have changed the title of the review and abstract, focusing on metastatic disease.

2. I would include a table to summarize available biological agents for the treatment of metastatic colorectal cancer and respective molecular targets/ associated biomarkers

We appreciate your suggestion, we added TABLE 2 containing a list of available
