

## Confirmation of Statistical Analysis

March 22<sup>th</sup>, 2017

The statistical methods of the study entitled **“Effect of silymarin on biochemical indicators in patients with liver disease: systematic review with meta-analysis”**, submitted to the World Journal of Gastroenterology were reviewed by Priscila Ribas de Farias Costa, from the School of Nutrition of the Federal University of Bahia, Brazil. I have a doctorate in Public Health with emphasis in Epidemiology and Biostatistic (Public Health Institute - ISC/UFBA with 12 months sandwich period at London School of Hygiene and Tropical Medicine - LSHTM) and Master degree in Nutrition and Health (School of Nutrition - ENUFBA) with emphasis in Epidemiology of Nutritional Diseases and Biostatistic.

Salvador-Brazil
