COMMENTS TO AUTHORS

The article is aimed to describe the role of the new endoscopic techniques in inflammatory bowel disease management. The title is "The role of the new endoscopic techniques in inflammatory bowel disease management: the change has come?". 1. Several factors influence the efficacy of the endoscopic techniques. Some limitations might be occurred? Please discuss these factors. 2. Unfortunately, the authors did not show the cost-effectiveness of this technique. 3. Please also add more details of the limitations of the study. 4. What are the new knowledges from this report? 5. Finally, please recommend the readers "How to apply this knowledge for routine clinical practice?".

COMMENTS TO AUTHORS

COMMENTS TO THE AUTHORS

* Since the article mainly refers to the ways of endoscopic surveillance of patients with ulcerative colitis, the title should be changed accordingly. We propose the following title: “_THE ROLE OF THE NEW ENDOSCOPIC TECHNIQUES IN INFLAMMATORY BOWEL DISEASE CANCER SURVEILLANCE: THE CHANGE HAS COME?”_.

* If the text is an editorial article, then it should remain in its present format. However, if it is a short review, then it should be divided into thematic sections, e.g. Introduction – aim(s), methods of endoscopic surveillance and analysis of each of them, and finally, conclusions and suggestions to the readers by the authors based on the available data.
