

To whom it may concern:

The purpose of this letter is to verify that Hanyang Univ. provided the editing services for the following manuscript:

A new botanical drug, HL tablet, reduces hepatic fat as measured by magnetic resonance spectroscopy in patients with nonalcoholic fatty liver disease: A placebo-controlled, randomized, phase II trial

Corresponding Authors : Joo Hyun Sohn, Department of Internal Medicine, Hanyang University Hospital, 222 Wangsimni-ro, Seongdong-gu, Seoul 133-791, Republic of Korea.

The edited document was returned to the writer on 17-01-2017. We are unaware of any changes or additions made to the manuscript after that time.

Sincerely,

Industry-University Cooperation Foundation, Hanyang University.

A handwritten signature in black ink, appearing to read 'Sungdukhyun', with a long horizontal stroke extending to the right.
