Retroperitoneal epithelioid sarcoma: A case report

José A Coronado, Jony Cerna, Miguel Á Chávez, Martín A Manrique, Ana L Trejo

Abstract

Epithelioid sarcoma (ES), a mesenchymatous malign neoformation, is often diagnosed in later stages and associated with high recurrence index, metastasis and mortality. We report a case of a 65 year old male, with history of abdominal pain and upper gastrointestinal bleeding. Endoscopy demonstrated a posterior duodenal wall perforation communicating with a solid retroperitoneal neoformation. Endoscopic
