

The statistical methods used in the study "Efficacy and safety of combined directly acting antivirals for the treatment of Chinese chronic hepatitis c patients in a real-world setting" were reviewed by Sai-Nan Zhu from The department of biostatistics, Peking University First Hospital (assistant director technician, PhD; phone number: 010-66115216, E-mail: zhusainan77@163.com).

Statistical methods are adequately and appropriately described when they are used to verify the results; the statistical techniques are suitable; the number of enrolled and excluded is given; statistical data are showed appropriately.
