COMMENTS TO AUTHORS

This is a very useful comprehensive, easy to read review of laparoscopic Splenectomy. I would support it for publication Would recommend the following amendments; 1. In the Splenomegaly section, the Author should recommend the use of the diameter as the use of weight can be only achieved after splenectomy 2. The word Semilateral is more surgically accepted than hemilateral.

COMMENTS TO AUTHORS

Laparoscopic splenectomy will become in the near future the standard procedures for almost all cases of splenectomy.
