

## PEER-REVIEW REPORT

**Name of journal:** World Journal of Gastroenterology

**Manuscript NO:** 33523

**Title:** Hepatoprotective Effects of Foeniculum vulgare root barks extract on Carbon Tetrachloride Induced-Hepatic Fibrosis in mice

**Reviewer's code:** 03537327

**Reviewer's country:** Hungary

**Science editor:** Yuan Qi

**Date sent for review:** 2017-03-09

**Date reviewed:** 2017-03-20

## COMMENTS TO AUTHORS

The authors's aim were to investigate hepatoprotective effects of Foeniculum vulgare root barks on carbon tetrachloride-induced hepatic fibrosis in mice. The methods are appropriate, the results are moderate. The article is a well-written but the authors would have considered more references. The authors have to rewrite the discussion part and give credits to more authors who considered natural plants hepatoprotective effects. Questions: Why did you select olive oil for APIs?
