Current research and treatment for gastrointestinal stromal tumors

Kheng Tian Lim, Kok Yang Tan

Abstract

Gastrointestinal Stromal Tumors (GISTs) are the commonest mesenchymal tumors of the gastrointestinal tract and have since gained considerable research and treatment interest especially in the last two decades. GISTs are driven by the mutations commonly in KIT gene and less commonly in platelet-derived growth factor receptor alpha (PDGFRA) gene, BRAF gene and succinate dehydrogenase (SDH) gene. GISTs behave in a spectrum of malignant potential and both the tumor size and mitotic
