Liver transplantation in the treatment of severe iatrogenic liver injuries

Lauterio T *et al.* Liver transplantation for iatrogenic liver injuries

Andrea Lauterio, Riccardo De Carlis, Stefano Di Sandro, Fabio Ferla, Vincenzo Buscemi,
Luciano De Carlis

Abstract

The place of liver transplantation in the treatment of severe iatrogenic liver injuries has not yet been widely discussed in the literature. Bile duct injuries during cholecystectomy represent the leading cause of liver transplantation in this setting, while other indications after abdominal surgery are less common. Urgent liver transplantation for the treatment of severe iatrogenic liver injury may represent a
