Acute and chronic hepatobiliary manifestations of sickle cell disease: A review

Rushikesh Shah, Cesar Taborda, Saurabh Chawla

### Abstract

Sickle cell disease (SCD) is a common hemoglobinopathy which can affect multiple organ systems in the body. Within the digestive tract, the hepatobiliary system is most commonly affected in SCD. The manifestations range from benign hyperbilirubinemia to overt liver failure, with the spectrum of acute clinical presentations often referred to as "sickle cell hepatopathy". This is an umbrella term referring to liver dysfunction and
