**Manuscript Type:** Case Report

**Atypical manifestation of herpes esophagitis in an immunocompetent patient: Case report and literature review**

**Fabiola Rios De Choudens, Sajiv Sethi, Shuchi Pandya, Sowmya Nanjappa, John N Greene**

### Abstract

Herpes simplex virus (HSV) is known to cause esophagitis in immunosuppressed patients; however, it is rarely seen in immunocompetent patients. We present a unique case of HSV esophagitis in a healthy male, without any immunocompromising conditions or significant comorbidities. The patient presented with a two-week history of dysphagia, odynophagia and epigastric pain. Physical exam revealed oral hyperemia

An atypical manifestation of herpes esophagitis in an immunocompetent p
