Dear Editor,

Please find enclosed the edited manuscript in Word format (file name:34218-review.doc).

**Title: A study to determine guidelines for pediatric colonoscopy**

**Author:** Shinichiro Yoshioka, Hidetoshi Takedatsu, Shuhei Fukunaga, Kotaro Kuwaki, Hiroshi Yamasaki, Ryosuke Yamauchi, Atsushi Mori, Hiroshi Kawano, Tadahiro Yanagi, Tatsuki Mizuochi, Kosuke Ushijima, Keiichi Mitsuyama, Osamu Tsuruta, Takuji Torimura

**Name of Journal:** *World Journal of Gastroenterology*

**ESPS Manuscript NO:** 34218

The manuscript has been improved according to the suggestions of reviewers:  
Revision has been made according to the suggestions of the reviewer

**Reviewer 1**

This is a very interesting article on an important topic. However, a few changes need to be done.

1. Title should be changed to - A study to determine guidelines for paediatric colonoscopy.

**Answer**

We changed the title to 'A study to determine guidelines for pediatric colonoscopy'.

2. Since ileal intubation has been achieved the authors should discuss if this is necessary and also if routine biopsy is needed.

**Answer**

We added the sentence 'In addition, our finding suggests that the observation of terminal ileum is needed to diagnose IBD, especially CD.' in Discussion.

We did not perform routine biopsy in this study. We mentioned 'Mucosal biopsies were not routinely performed and were performed based on the presence of macroscopic abnormalities and endoscopist experience.' in Patients and Methods.

**Reviewer 2**

The author mentioned the management and diagnosis of pediatric colonoscopy in many

cases. I think this is a very important report.

**Answer**

We appreciate your comment.
