COMMENTS TO AUTHORS

Comprehensive Review Major issues - Is there a permission to use figures 1 and 2? This should be noted - Table 4: IMWG should be explained. The reference should be given. Is the table copy and paste or is adapted? This should be given in detail Minor issues How does lenalidomide compormise mobilization? Please discuss that. It will be interesting to give your current practice at your institution. What do the authors in case of mobilization failure. Do they proceed to BM harvest? Please discuss that according to the available literature.

COMMENTS TO AUTHORS

The article of Anna Huesing-Kabar and collaborators shows Single-operator cholangioscopy for biliary complications in liver transplant recipients. This is a good piece of work, data are consistent, paper is well written and conclusions based on presented data. I think this manuscript is currently appropriate to be published in World Journal of Gastroenterology.
