Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 3459-Review.doc).

Title: Prospects and challenges for intestinal microbiome therapy in pediatric gastrointestinal disorders

Author: Richard Kellermayer

Name of Journal: World Journal of Gastrointestinal Pathophysiology

ESPS Manuscript NO: 3459

The manuscript has been improved according to the suggestions of reviewers. Please find the corrections made underlined and our specific responses in the comments.

1 Reference was corrected with including PMID and DOI. However, we did not agree with including over 100 references. The manuscript does not require this by my opinion. There were some citations for which only PMID or DOI was available.

Thank you for considering our invited review (I would like to highlight that this work is an invited review from me as an Associate Editor) for publication the *World Journal of Gastrointestinal Pathophysiology*.

Sincerely yours,

Richard Kellermayer M.D., Ph.D.
