PEER-REVIEW REPORT

Name of journal: World Journal of Radiology

Manuscript NO: 34690

Title: Dynamic Contrast-Enhanced MRI for Detection and Monitoring of Prostate Cancer: A Review of Current Methods and Applications

Reviewer's code: 00289470

Reviewer's country: Italy

Science editor: Li-Jun Cui

Date sent for review: 2017-05-19

Date reviewed: 2017-06-04

COMMENTS TO AUTHORS

Overall, this is a clear, concise and well-written review. The methods are generally appropriate. Excellent tables and figures help the readers in a better understanding. The manuscript is suitable for publication. Typo close to ref 28 along the text : "Gleason" instead of "Glesao"

COMMENTS TO AUTHORS

In the "Localization and staging" of the prostate cancer, the role of DCE MRI in the PI-RADS (Prostate Imaging Reporting and Data System) would be mentioned. In the "Assessment of Treatment Response", the DCE MRI findings after high-intensity focused ultrasound (HIFU) would be mentioned. The timing of MRI after HIFU for the prostate cancer is important.
