

Editor-in-Chief
World Journal of Gastroenterology

Dear Editor,

We are responding to the reviewer comments on our original article of the type Basic Study, titled “Fluctuation of zonulin levels in blood versus stability of antibodies,” which we have submitted for possible publication in your journal, *World Journal of Gastroenterology*, and which you have given the submission number of 34731.

We would like to thank the reviewer for the insightful comments and constructive suggestions. We are gratified that the reviewer thinks the paper is well done and is very relevant. In retrospect, we agree that the same information presented in several figures could be compacted so as to make the article leaner, less ponderous, and tighter, and so we have taken the reviewer’s advice and have replaced those latter figures with an informative table. We have also added the Comments section as required by the journal.

We feel that the manuscript is now easier to read, understand, and take in, and we hope that it is now suitable for publication.

Respectfully,

Aristo Vojdani, PhD, MSc, CLS
