PEER-REVIEW REPORT

Name of journal: World Journal of Gastrointestinal Oncology

Manuscript NO: 34839

Title: Gastric metastasis from ovarian adenocarcinoma presenting as a subepithelial tumor and diagnosed by endoscopic ultrasound-guided tissue acquisition

Reviewer's code: 00504611

Reviewer's country: United Kingdom

Science editor: Fang-Fang Ji

Date sent for review: 2017-06-12

Date reviewed: 2017-06-12

COMMENTS TO AUTHORS

This is an interesting case report which reads well. I have only very minor suggestions: Some arrows in Figures 1 and 2 would be helpful to indicate the features being described Page 3 last line : "metastasizes" rather than "metastatizes" Page 4: "vascularized" rather than "vascolarized" Page 4: "in the literature" rather than "in literature" Page 4: "After a diagnosis of metastatic ovarian cancer to the stomach had been achieved" rather than "After a diagnosis of metastatic ovarian cancer to the stomach has was achieved"

COMMENTS TO AUTHORS

Metastatic disease involving the stomach is a rare event. The lifetime prevalence is only 0.7-1.7% in patients with known malignancies. Common sources are breast cancer, lung cancer, esophageal cancer, renal cell carcinoma, and malignant melanoma. Gastric metastasis from ovarian cancer is exceptionally rare. Only 16 cases have been reported in the English literature. I don't consider case reports, but subject review are good. Table needs to be reviewed in consideration of the 16 cases. Some molecular biology background needs to be emphasized in the discussion. The role of the pathologist is essential and cannot be acknowledged only. He needs to be a co-author!
