Clinical Trials Study

Laparoscopic complete mesocolic excisions for colonic cancer in the last decade:
Five-year survival in a single centre

Kristian Eeg Storli, Kristin Bentung Lygre, Knut Børge Iversen, Maria Decap, Geir Egil Eide

Abstract

AIM: The aim of the study was to analyse clinical and long-term oncologic results after laparoscopic complete mesocolic excision (CME) for colonic cancer over a 10-year period.

METHODS: Consecutive patients who received laparoscopic CME at our hospital
