

Answering reviewers for manuscript number: 35044

Manuscript title:

Autoimmune hepatitis in HIV infection: case report and literature review

Based on the peer-reviews and editor suggestions we make the next modifications to the manuscript:

- Format has been updated
- Change the manuscript title to: **Autoimmune hepatitis in HIV infection: case report and literature review**, in correlation with the database search and description accomplished of the cases reported for AIH in HIV patients.
- Remark the impact of combined ARV therapy as one of the most effective interventions in decreasing onward HIV-1 infections.
- Add the reports of complementary virological studies (viral loads) not described in the original manuscript.
- Fill the comments items.
- References correction
- Decompose the figures to ease edition.

All comments were very appreciated and made possible the improvement of the manuscript.

Thanks again, we are pleased for be considered to publish our manuscript in the *World Journal of Clinical Infectious Diseases*.

Sincerely yours,

Ivan Noreña MD
