Extrapancreatic solid pseudopapillary neoplasm followed by multiple
metastases: Case report

Hao Wu, Yan-Fen Huang, Xiang-Hong Liu, Mei-Hua Xu

Abstract

Background: Solid pseudopapillary neoplasm (SPN), also known as Gruber-Frantz tumor, is a rare form of neoplasm that almost exclusively occurs in the pancreas and in young females. While the potential of malignancy is low for SPN, these tumors can mimic other diseases and require a meticulous investigation and a standard treatment by total surgical resection.

Case report: We present an unusual case of SPN arising in the mesentery of a 40 years
