COMMENTS TO AUTHORS

Dear authors, I gave a positive judge on your manuscript on training of gastroenterologists in bariatric therapy. I think it affords an important issue for the future treatment of these patients, always increasing in number and complexity of care. Maybe it could be extended to all the physicians involved in such treatment (surgeons, psychiatrics, nutritionists, and so on), and also to the organization of a bariatric unit, but I understand that it would become a little too big.

COMMENTS TO AUTHORS

This is a well written manuscript on an emerging issue. However, bariatric surgery has been increased worldwide; thus additional information about bariatric surgery and related complications (i.e. nutritional deficiency) have to be discussed.
