COMMENTS TO AUTHORS

This study evaluated the liver regeneration capacity after partial hepatectomy in a rat model of non-alcoholic steatohepatitis induced by a high fat high cholesterol diet. The study is interesting and well designed. The manuscript is well written, and acceptable for publication. Representative histological slides should be included in the results.

COMMENTS TO AUTHORS

The manuscript "Preserved liver regeneration capacity after partial hepatectomy in rats with non-alcoholic steatohepatitis" is suitable for publication after minor revision. Although the study has some limitations, as the authors have mentioned, overall the data and the methods used are satisfactory to draw conclusions. "Supplementary Fig. 5, Supplementary Fig. 6, Supplementary Fig. 7" that appear in the text (page 14), they do not appear in the manuscript.
