Manuscript NO: 36452

Manuscript Type: ORIGINAL ARTICLE

### *Case Control Study*

Increased intestinal mucosal leptin levels in patients with diarrhea-predominant irritable bowel syndrome

De-Rong Liu, Xiao-Juan Xu, Shu-Kun Yao

### **Abstract**

#### *AIM*

To measure leptin levels and analyze the relationship of leptin with clinical features, visceral sensitivity, mast cells, and nerve fibers.

#### *METHODS*

Forty-two patients with diarrhea-predominant irritable bowel syndrome (IBS-D) fulfilling the Rome III criteria and 20 age- and sex-matched healthy
