**Here are our answers / comments to the Reviewer:**

Dear Reviewer,

First, we would like to thank you for your useful suggestions.

We have prepared a new figure representing the composition and function of the IGF/IGFR axis.

We have also added a new table highlighting the connections between IGFR system and autophagy in clinical situations.

The text has been revised, and typos have been corrected.

All changes are highlighted by yellow colour in the text.

We do hope that our answers are acceptable for the Editors of WJG.

Thank you again for considering the possible publication of our manuscript in World Journal of Gastroenterology.

Sincerely yours,
