Sequential spinal and intracranial dural metastases in gastric adenocarcinoma: A case report

Kim HS *et al.* Dural metastases of gastric adenocarcinoma

Hongsik Kim, Kyung Sik Yi, Won-Dong Kim, Seung-Myoung Son, Yaewon Yang, Jihyun Kwon, Hye Sook Han

Abstract

Dural metastasis from primary gastric adenocarcinoma has been rarely reported, and its prognosis is very poor because it frequently leads to acute subdural hematoma. Here, we describe a case with sequential spinal and cranial dural metastases from gastric adenocarcinoma without subdural hematoma. A 43-year-old women with

2016年3月1日 - Gastric cancer with brain metastasis is rare. The present study reports a case of gastric cancer with isolated brain metastasis 1 year after gastrectomy. To the best of our knowledge, there have been no prior reports of solitary brain metastasis from gastric cancer with peripheral nervous system symptoms.

A Japanese study showed that the incidence of bone metastases of gastric cancer was 13.4% among autopsies. It is very rare for the primary presentation of a gastric malignancy to be with bone metastases. This case report is of a 46-year-old female patient, who presented with a thoracic vertebral wedge fracture and was ...
