## COMMENTS TO AUTHORS

Comments for ESPS Manuscript NO 37126 This paper is interesting and well written. There are no major and few minor concerns. Regarding the latter, minor language polishing is needed. For example, under Abstract (and Core tip), there is a grammatical mistake in the following sentence: "The study limitations and advantages are discussed in the light of recent advances in the HCC and estrogen signalling areas." Please correct it. In addition, the format of this manuscript should be revised according to WJG's requirement.
