

Biostatistics statement

I, Pr Laurent Spahr, Professor of Hepatology at the division of Gastroenterology and Hepatology, Geneva's University Hospitals and Faculty of Medicine of Geneva, certifies that the statistical analysis of articles entitled:

« Collagen proportionate area correlates to hepatic venous pressure gradient in non-abstinent cirrhotic patients with alcoholic liver disease »

was performed and verified by Nicolas Goossens, (M.Sc. Evidence-Based Healthcare, University of Oxford)

This certificate is delivered to the concerned person for any purposes for which it may be required.

Pr Laurent Spahr, MD

Professor of Hepatology
